EXPERIENCE

Research Scientist – Hewlett Packard Labs

Sept 2022 – Present

- Working in the Networking and Distributed Systems Lab (NDSL) at Hewlett Packard Enterprise

Research Assistant – WiNS Lab (Northeastern University, University at Buffalo)

Oct 2017 – Aug 2022

- Looked at aspects of using high speed millimeter-wave networks (802.11ad/5G) on smartphones and the effect on the power consumption and performance of high-quality video/VR/AR applications
- Worked on the Linux kernel to modify Multipath TCP using 60 GHz and 5 GHz networks to optimize performance under various possible scenarios
- Performed experimental evaluation and analysis of commercial off-the-shelf 60 GHz devices such as APs, laptops, and smartphones to understand the performance of such devices as compared to the understanding of the challenges faced by millimeter-wave networks

Research Intern – NEC Laboratories America, Inc.

May 2021 – Mar 2022

- Worked on enabling real-time user localization and tracking in indoor environments leveraging existing WiFi infrastructure using 802.11mc WiFi FTM ranging

Teaching Assistant – Department of Computer Science and Engineering (University at Buffalo)

Jan 2018 – May 2019

Jan 2020 – May 2020

- Worked as a Teaching Assistant (TA) for the Modern Networking Concepts course and the Operating Systems course
- Held recitations and office hours to help students and guide them through the demanding course projects

Research Assistant – ODIn Lab (University at Buffalo)

Jun 2017 – Dec 2017

- Worked on Mimir database, a probabilistic database which attempts to guess missing and incorrect values to assist with efficiently dealing with messy data.
- Worked on prioritizing data errors to be fixed by building a linear solver based on confidence gain. Also, built a model to fill in missing values by detecting functional dependencies between attributes.

Research and Development Intern – Defence Research and Development Organisation (DRDO)

Feb 2016 – Jun 2016

- Used data mining techniques to find ways to improve the cyber security of government networks by increasing the rate of intrusion detections.
